

The Salon Network

The salon network is vital to the success of *my new hair*. They enable the service to be offered across the country and accessed at a local level.

Becoming a *my new hair* stylist is both a rewarding and challenging experience. Although it will have its personal rewards, you may be faced with situations not previously encountered. For this reason, our training not only covers styling and maintaining wigs, but also in how to manage situations you may find yourself in. The charity will provide guidance, advice and practical training to support you.

A *my new hair* Salon will:

- Support and assist the client in preparation for their hair loss by providing step by step style options or other headwear options
- Style and personalise their wig and advise them on wig care
- Offer a private consultation area within the salon if possible.
- Provide a standardised approach to deal with enquiries
- Offer after care services where appropriate
